ROLLOVER

THE ART OF LAMINATING

The innovative and trendsetting Rollover Flatbed Applicator simply offers a better way of solving the daily challenges of the sign making industry. The excellent functionality is powered by the idea of facilitating and streamlining the multiple tasks encountered in the daily work of signmakers. Regardless of media type such as self-adhesive foil applications, road signs, glass application, banners etc. up to 90mm in thickness, the Rollover will ensure a perfect result at a minimum of time.

Optimal ergonomic work positions have been the basis for the design. Being able to comfortably operate the laminator with one hand whilst having free access to roller, media and tabletop, results in smooth and effective handling. We can guarantee that the operator will not miss the climbing and knee-bending... Perfectly flat application without bubbles or creases is obtained in a minimum of time, and waste is minimised. Illuminated glass tabletop and special cutting mat will improve accuracy and control in operation, and also make the Rollover a

perfect work place for many other tasks of the trade.

The Rollover is extremely user-friendly, and the operator can learn how to use it in less than one hour thanks to the detailed Manual supplied on delivery. Flexible extra media-holders and side trays facilitate numerous applications and handling of oversize media. The gap between roller and tabletop accommodates different substrates up to 90mm thickness.

EASY ONE-HAND OPERATION

By using the ergonomically shaped and inward-facing handles, the roller can be moved easily over the tabletop both in a raised and lowered position.

ROUNDED HOUSINGS

No sharp edges and protected activation switch provide superb and unobstructed access to the work surface

HANDY TOOL POCKETS

Store your tools in these conveniently placed pockets on each housing.

SELF-HEALING CUTTING MAT

Transparent 5mm PVC (Phtalate-free) cutting mat. Improves accuracy when cutting and control in operation.

ILLUMINATED (LED) GLASS BED

The work surface can be back lit to improve accuracy in operation, cutting etc.

LARGE SIDE TRAYS

For storage and handling of oversize media across the table top

CASTORS

To enable easy relocation and transport of the machine.

DESIGNED AND ENGINEERED
IN NORWAY

” The Rollover is the perfect 3rd or 4th worker you can add to your workforce in any sign shop. We still love ours!
We call it 'Darth', it is the best thing we have ever bought and I can't believe I didn't invent them myself.

~ Deb Top End Sign Sales, Darwin NT, Australia.

ATTACHMENT POINTS
For brackets & spindles holding media and application tape. Also found at the roller housings.

” We can now apply all our graphics and premask without bubbles or creases within seconds

~ Andrew Mc Cabe, AMC Branding, Dublin.

AREAS OF USE

” The Rollover is proving to be a great addition to our business. It's faster and cleaner. One man can do jobs now that in the past needed two, and he can do them quicker. Appo tape is breeze compared to doing it the old way. We've got improved productivity, faster turnaround, lower costs and happier staff. The Rollover has been a win all around for us at AWS.

~ Trent Albury Wodonga Signshop, Wodonga VIC, Australia.

” You cannot run a Sign Shop without a Rollover, anyone thinking of buying one should just buy one !, - it is an Incredible Piece of Kit

~ Ray McCarthy, Extrabrite Signs, Dublin

RIGID PANEL APPLICATION / LAMINATING DIGITAL PRINTS

Applying digital prints and other self-adhesive applications on rigid panels e.g. correx, foames, dibond, aluminium etc., is just one of the areas where the Rollover reveals its excellent properties in result and operation. Substrates up to 90mm thick can be handled for perfectly flat applications without bubbles or creases.

The great flexibility of the rollover laminating system is already evident in conventional laminating in which digital prints may be coated with protective laminates. Especially when using formats covering the full working surface of the Rollover, these jobs can be done quickly and without bubbles or creases.

We do a lot of mounting onto long panels and the six metre is great. Since it was installed the Rollover has made us much more productive and more confident in delivering large and small signage on time and at a consistent quality finish.

~ **Brian Signs, Caboolture QLD, Australia**

I purchased the flexi because I work by myself and always found it difficult to do larger jobs without paying someone to help me. Now I do them on my own, deliver a better finish sign and faster. Yes - the Rollover is paying for itself.

~ **David Stickers & Signs, Noosaville QLD, Australia.**

Since we introduced the Rollover Laminator in our production, the efficiency has improved drastically. We are indeed pleased with our Rollover, and have not experienced problems of any kind. The level of quality on the machine itself and the various applications made has met and even exceeded our expectations. I am happy to recommend the Rollover to anyone working in the Graphic Arts Industry

~ **Tommy Evensen, General Manager – Kursiv Skilt & Dekor AS, Norway**

I am only a small sign company, since it was installed the Rollover has made me much more productive and more confident in delivering large and small signage on time and at a consistent quality finish.

~ **Andrew AMS Signs, Nambour QLD, Australia**

We have just installed our Rollover 6,0m x 1,70m, and the machine is amazing! Thank you very much

~ **João Borges, Commercial Director – Publifrades, Portugal**

APPLICATION/ TRANSFERTAPE

Executing frequently occurring tasks like the use of application tape, is easily transformed into a «One man- or one woman show». By using the extra media holders, the full width of the tabletop can be utilised. Besides the perfect result, great savings in time and cost are obtained by using the Rollover Applicator.

ASSEMBLY OF OVERSIZE MEDIA

By using the generously spaced side shelves, wide banners or other oversize media can be handled across the tabletop. This allows e.g. multi-line foil labels and digital prints to be transferred to large formats.

THE ROLLOVER AS WORK STATION

Last but not least, when cutting on the self-healing cutting mat or even working with flexible skins and hoardings, Rollover offers with its back-lit work area the best basis to cope with an advertising technicians everyday strive.

ROLLOVER

FLEXI

Rollover Flexi is the new, flexible addition to the Rollover range. Comprising all the essential qualities of the existing line of Flatbed Applicators, this unit also offers quick dismantling to facilitate entering of premises having difficult access.

The Rollover Flexi represents our well known high level of quality, craftsmanship and durability. Having no overhead gantry above the roller, the access to media and substrates while working is superior.

The Flexi Model arrives fully assembled, but is constructed for convenient & quick dismantling in 3 main sections:

- The sliding arms/roller gantry
- The glass bed and supporting frame
- The leg section

These elements can be individually transported into premises having difficult access. This is done either manually or by using the specially developed transport tool.

“ Now we know we did the right choice when we decided to purchase your machine. We're very pleased with your machine and your aftersales service. It's very important for us to know we are working with a trustworthy company like yours.

~ Manuel Fernández Rubio – Dpto. Imagen Digital, Tenerife

“ Rollover in my hands! Just wanted to drop you an email and let you know I took delivery of my rollover table yesterday, and I am totally excited! I put the table together with no problems, and this baby works like a dream!

You guys did an awesome job in the engineering, and the manufacturing of this product! Well worth the wait!

Thanks Again!

~ Richard Janecka, MSE – Owner, Sign Crafters, Texas

ACCESSORIES

We have developed a number of accessories to make the daily use of your Rollover even easier and more efficient.

SELF-HEALING CUTTING MAT FOR REPLACEMENT

- ✓ Available in any model size as well as customized
- ✓ Non-phthalate – contains no harmful substances
- ✓ Improves accuracy when cutting and control in operation

ROLLOVER ROLL CRADLE 25CM/9,8" AND 60CM/23,6"

- ✓ Designed to carry and feed from media rolls
- ✓ Flat base for stable placing on the table top
- ✓ Comes in 2 lengths and in combination fits any roll size

ROLLOVER AIR GUN W/SPIRAL HOSE

- ✓ Blows away debris and dirt from the work surface
- ✓ Quickly connected to the integrated air outlet
- ✓ Comes with 6m spiral hose

ROLLOVER SILENT COMPRESSOR

- ✓ 20l twin tank
- ✓ 42dB
- ✓ Oil free
- ✓ Max. 8 bar
- ✓ Weight 18kg

ROLLOVER LONG REACH CUTTER

- ✓ This extremely practical tool allows you to cut media across the table without having to lean or crawl. Retractable rod from 75cm to 130cm of length
- ✓ Spare blades 10pcs/pack

CORE ADAPTORS

- ✓ Makes it quick & easy to attach media rolls to the spindle on your Rollover
- ✓ Fits standard inside core diameter of 75mm
- ✓ Comes in sets of 2 pieces.

CONTACT CLEANER

- ✓ Cleans any flat surface
- ✓ Ergonomic design of the handle as well as optional extendable shaft
- ✓ After one cleaning operation, the roller is placed in the automatic cleaning station to refresh before next application.

ANTISTATIC EQUIPMENT

- ✓ Rugged design
- ✓ Ideal for use in industrial applications
- ✓ Ionising air guns neutralise static charges on several materials and clean the surface using ionised compressed air.

ADDITIONAL MEDIA HOLDER

- ✓ Facilitates media handling
- ✓ Fits both table ends as well as the roller housings.

SAFETY STRAIGHT EDGES

- ✓ Super safe straight edge for marking, drawing, scoring & cutting. Strong & precise yet lightweight & portable

OVERHEAD IONISING BLOWER AEROSTAT® GUARDIAN

- ✓ Provides superior static charge decay over an entire work surface area.
- ✓ Equipped with task lighting and an integrated heater
- ✓ User-friendly operation

OPTIONAL FEATURES

THE ROLLOVER CLASSIC

- ✓ Height adjustable legs – electrically driven 85cm – 110cm
- ✓ Twin rollers
- ✓ Heat assisted roller 30°C – 50°C
- ✓ Support for Keen Cut EVO2 Cutter
- ✓ Antistatic equipment
- ✓ Vinyl Remover Bracket
- ✓ Extended gap between roller and glass bed
- ✓ Support for Vinyl Remover VR15

THE ROLLOVER FLEXI

- ✓ Support for Keen Cut EVO2 Cutter
- ✓ Antistatic equipment
- ✓ Vinyl Remover Bracket
